Synthetic Guideline: Evaluation of Low Hemoglobin and Iron Markers

SYNTHETIC TRAINING DOCUMENT - NOT FOR CLINICAL USE

Knowledge Base ID	KB-ANEMIA-01
Document Type	Medical Guideline PDF
Status	Synthetic educational content

Scope

This document is a simplified synthetic guideline for demonstrating retrieval-augmented generation. It is not a clinical guideline.

When low hemoglobin is reported

• Review the complete blood count and red-cell indices.

• Correlate low hemoglobin with symptoms and available history.

• Review iron-related measurements when they are available.

• Consider whether additional evaluation is needed based on the overall clinical context.

Follow-up principle

The assistant should present retrieved guidance as follow-up considerations and should not present a definitive diagnosis or treatment plan.
